PoC Device Comparison Guide

[Hytera Push-to-Talk over Cellular \(PoC\) devices](#) are purpose built for professional business communications. These compact and easy-to-use devices enable instant group calling over nationwide 4G/5G/LTE cellular networks and Wi-Fi networks. The devices switch over to the LTE network automatically when out of Wi-Fi range.

Hytera PoC devices are ruggedized to support harsh work environments and feature digital noise suppression and high-volume speakers for excellent voice quality in loud areas. Deployments are quick, low-cost, and require no traditional radio system infrastructure or frequency licenses.

Hytera PoC devices can be deployed as a Radios-as-a-Service subscription on the [HORIZON Nationwide PoC Platform](#). Hytera PoC devices are also supported on the [HORIZON Dispatch](#) web-based communication and location tracking dispatch application. HORIZON Dispatch features instant group calling and real-time GPS fleet tracking.

Hytera PoC devices can be integrated with existing radio systems using [Hytera Bridge](#), which provides a simple, reliable, and cost-effective Radio over IP (RoIP) gateway between Hytera PoC radios and a variety of DMR and analog radio systems.

HORIZON

Hytera PoC Devices Support Nationwide Instant Group Calling, Dispatching, and Location Tracking.

The Variety of PoC Devices Provide the Right Radio for your Specific Needs

PNC360S Compact PoC Radio

The [PNC360](#) is a cost-effective, rugged, and easy-to-operate PoC device. This ultra-compact device provides one-handed operation and can be carried on a lanyard.

PNC380S PoC Radio

The [PNC380S](#) is a rugged, full-featured, and easy-to-operate PoC device that is AT&T and T-Mobile Network Ready, PTCRB certified, and features an optional dash-mount car kit.

PNC560 and PNC560S PoC Mobile Computers

The [PNC560](#) is a compact, rugged, and easy-to-operate PoC smart handheld device that runs Android mobile business apps and features a built-in scanner. The PNC560S is a lower cost device without a scanner.

MNC360 POC Mobile Radio

The [MNC360](#) is a compact and easy-to-operate Push-to-Talk over Cellular (PoC) Mobile Radio that provides safe and reliable in-vehicle fleet communications with great audio quality.

HORIZON Dispatch

HORIZON Dispatch is a powerful web-based dispatch application for Hytera PoC devices

- Provides instant group voice calling, private individual calling, and enables dispatchers to quickly build dynamic call groups
- Enables tracking of driver locations and travel routes with time stamps
- Draw geofence boundaries and receive alarms when workers enter or leave geofence areas
- Users can communicate with each other and dispatch with free-form or predefined text messages
- Share videos and images with other PoC devices
- Comprehensive call recording, logging, and playback

HORIZON Platform Details

Description	HORIZON is a subscription-based PoC radio service that provides nationwide communications using cellular LTE and Wi-Fi networks. It supports individual and group calling and the web-based HORIZON Dispatch application.
Pricing Model	HORIZON is a low-cost 1-year or 2-year subscription service plan that may include the monthly LTE SIM card charge. Customer purchases the PoC devices for use in the subscription plan.
Reliability	HORIZON state-of-the-art cloud servers provide industry-leading reliability and system availability with geographically diverse fail over redundancy
Scalability	HORIZON supports unlimited users. Ideal for growing organizations that need flexible scalability and dispatching. HORIZON also supports cross-enterprise group calls to any other company with HORIZON PoC service to enable efficient collaboration with partner organizations.
Coverage	Nationwide PoC Cellular and Wi-Fi coverage
Required Infrastructure	None required
Radio Types	Supports all Hytera PoC devices
